

Anna Gegova

Software Engineer

T: +359 876 762 686

E: annakrsmrv@gmail.com

A: 1700 Sofia, Student city

Professional skills

- ↳ Knowledge of Web Design, Computer Architecture, Software Architecture;
- ↳ Strong knowledge Object-Oriented Programming, and analysis and synthesis of algorithms;
- ↳ Experience in Java, Spring Boot, C#, .NET, Android applications, database analysis and design.

Personal qualities

Strong communication skills - **team player**, creativity, strong analytical and problem skills - **an eye for detail**.

Hobbies

Playing chess - great way to unwind, destress, and keep the mind sharp.

Few words about me

A **computer science student** highly motivated to expand her knowledge and pursue a career in the field. Employs good communication skills and multi-tasking strengths. Demonstrates problem-solving ability and adaptively to dynamically changing environment. A candidate willing to work in team, oriented towards goal achieving and results.

Education

Technical University of Sofia

2019 - till now

3rd year student studying for Bachelor's degree in Informatics and Software Science

Studied fields: introduction to programming, object-oriented programming, technical informatics, synthesis and analysis of algorithms, Java programming, computer architecture, database management, internet based technologies, operation systems, bioinformatics, software architecture, software technologies, cryptography

Experience

IOVASOFT

08/2020 – 02/2021

Software Engineer Trainee

Tasks: Learning Spring Boot and improving database analysis skills. Creating an online blog for articles using Spring Boot and PostgreSQL including compile test schedules and reports when required. Communicating with mentor, when needed, to resolve issues and learn the application framework.

Projects

TECHNICAL UNIVERSITY

github.com/rotarat

Software Engineer

Creating multiple projects for different courses, such as Chess game, Online Dress Shop, visualization of Insertion Sort, some of which in a team with other students – Software architecture of an online trading application, Healthcare application.
